WYNN'S DIESEL INDUCTION SYSTEM CLEANER

PROFESSIONAL RANGE

ADVANTAGES

Wynn's Diesel Induction System Cleaner provides immediate thorough cleaning of air intake system and inlet valves, and dissolves gum, lacquer and carbon deposits.

BENEFITS

Wynn's Diesel Induction System Cleaner is designed to provide the following benefits:

- 01 Restores optimal air flow towards the combustion chamber
- 02 Improves fuel economy
- 03 Increases Power and improves acceleration
- 04 Eliminates & avoids irregular idle & hard starting
- 05 Eliminates knocking
- 06 Reduces black exhaust emissions
- 07 Safe to use with Oxygen sensors, DPF & other emission controls
- 08 Assists with the cleaning of the turbo and DPF if fitted

DIRECTIONS OF USE

Wynn's Diesel Induction System Cleaner (Product No. 23405) is administered via the Wynn's FuelSystemSERVE®+ tank, which is to be connected to the intake manifold via Wynn's Throttle Body Cleaning Tool (part no. 31500) before the throttle plate.

Start the engine, and when the engine is running, turn on the Wynn's FuelSystemSERVE®+ and operate as per instruction manual. The chemical will be then atomised and sprayed into the air intake manifold. The chemical will clean the intake manifold as the engine is running.

Do not apply Wynn's Diesel Induction System Cleaner on painted surfaces. If accidentally applied on paint, wash off immediately with water. Avoid prolonged contact with rubber and plastic components. Do not use or store Wynn's Diesel Induction System Cleaner near sparks, heat, or open flames. Keep area ventilated during use.

APPLICATIONS

Wynn's Diesel Induction System Cleaner is formulated for use with Wynn's FuelSystemSERVE®+ (Product No. 68432) as directed in the equipment manual.

Recommended to be used at each service interval or as required to maintain cleanliness. This can be achieved while the components are in place.

For optimal cleaning of the turbo and DPF, use in conjunction with Wynn's Turbo & DPF Cleaner & Regenerator (Product No. 31592).
