WYNN'S PETROL OCTANE BOOST

PROFESSIONAL RANGE

ADVANTAGES

Wynn's Octane Boost delivers high octane performance and valve-seat recession protection it increases RON by upto 5 units.

Wynn's Octane Boost overcomes engine knocking problems with whatever grade of petrol is used including unleaded (ULP), premium unleaded (PULP), or E10 petrol.

BENEFITS

Wynn's Octane Boost has been developed to provide the following benefits:

- 01 Improves engine performance & acceleration
- 02 Increases Research Octane Number (RON) by up to 5 units
- 03 Improves fuel efficiency
- 04 Provides upper cylinder lubrication
- 05 Stops pinging of petrol engines
- 06 Avoids mechanical damage caused by pinging (engine knocking)
- 07 Prevents valve seat wear
- 08 Helps reduce intake valve deposits
- 09 Safe for catalytic converters & oxygen sensors
- 10 Safe for use in turbo-charged engines

DIRECTIONS OF USE

Add Wynn's Octane Boost directly to the fuel tank. One 325ml bottle treats most standard petrol vehicles.

APPLICATIONS

Wynn's Octane Boost is recommended for use in all grades of petrol including leaded & unleaded.
