

Wynn's A/C Service cleans the evaporator, air ducts, and refreshes the passenger compartment!

Wynn's air-conditioning service eliminates the medium for micro-organisms and protects your air-conditioning system for long periods of time against contamination, and the harmful side effects to you or your passengers.

The advantages of A/C cleaning are clear:

- Pleasant and CLEAN air
- Long-lasting effect
- Eliminates cabin smells
- Prevents eye and throat irritation
- Prevents bronchial infections
- Prevents allergic reactions

Problems with air-conditioning

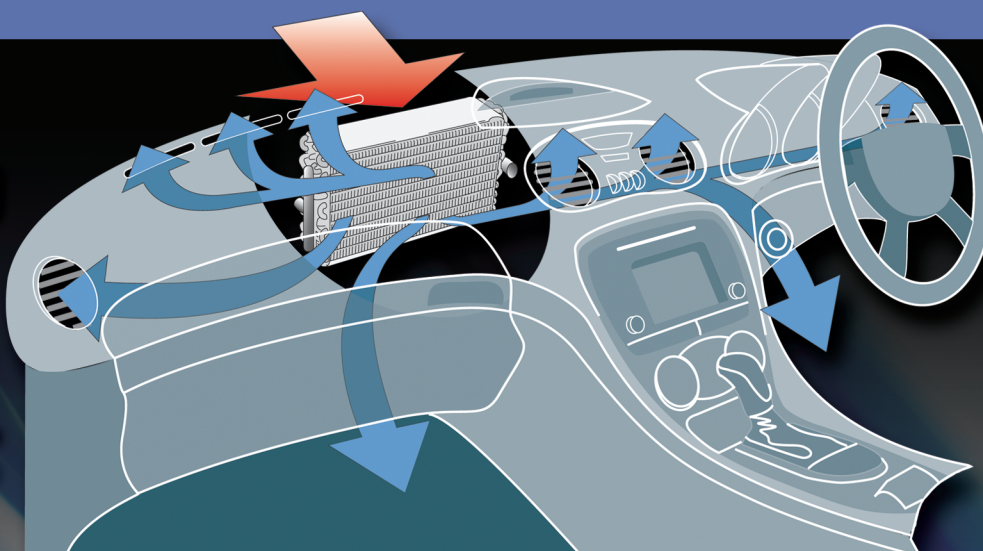

Air-conditioning systems are designed to provide a pleasant environment for driving, allowing for better concentration in traffic.

However, air-conditioned vehicles often cause runny noses, inflammation to eyes, sore throats and irritation of bronchial tubes. Moreover, air-conditioning systems often give off an unpleasant smell.

This is caused by the settling of mould and bacteria on the surface of the evaporator.

The moist and dark environment inside the air-conditioning system, where the temperature fluctuates, provides the ideal conditions for the growth of micro-organisms. Dust and pollen carried along by the air are the ideal medium for a huge growth of bacteria in this environment. When the air-conditioning is switched on, these micro-organisms are blown into the passenger compartment and are inhaled by the passengers.

The Aircomatic™ II service cleans the evaporator, refreshes the air ducts and the passenger compartment. The service cleans the evaporator surface and maintains the air purity in the car for long periods. It is recommended to repeat the treatment annually for optimum results.

Healthier air-conditioning for **you** and your family

Wynn's A/C Service cleans your air-conditioning system deep within, using a circular cleaning method based on ultrasonic vaporisation.

It eliminates:

- Unpleasant cabin smells
- Eye and throat irritation
- Bronchial infections
- Allergic reactions
