ABOUT THE PRODUCT: Wynn's Radiator Stop Leak stops and prevents radiator leaks. With its easy-to-use one shot treatment and backed by European technology, Wynn's Radiator Stop Leak seals leaks and controls gasket seepage.

ADVANTAGES: Wynn's Radiator Stop Leak prevents and seals minor external leaks in the cooling system and prevents head gasket seepage. It helps prevent corrosion and lubricates the water pump to improve cooling system efficiency and prolong pump life.

BENEFITS: Wynn's Radiator Stop Leak has been developed to provide the following benefits:

- Stops & prevents leaks
- Seals leaks in radiator & heater cores
- Prevents head gasket seepage
- Will not clog radiator waterways nor affect temperature sensors
- Suitable for all 4, 6 or 8 cylinder Petrol, Diesel, Hybrid and LPG engines
- Compatible with conventional, Hybrid and O.A.T. coolant systems
- Easy-to-use one-shot treatment
- Treats up to 12 Litres of coolant

APPLICATIONS: Wynn's Radiator Stop Leak is suitable for all 4, 6 or 8 cylinder Petrol, Diesel, Hybrid and LPG engines and is compatible with both conventional, Hybrid & O.A.T. coolant systems. Wynn's Radiator Stop Leak should only be used as a temporary repair for leaks. Wynn's Radiator Stop Leak can also be used as a once-a-year preventative measure to ensure your cooling system operates without any damaging leaks.

DIRECTIONS FOR USE:

1. With heater control in HOT position
2. Prior to opening, shake Wynn's Radiator Stop Leak bottle and add contents to the cooling system (CAUTION coolant may be hot)
3. Top up the system with coolant if required
4. Run engine for approximately 5 minutes to circulate and stop leaks
5. Contents will treat a cooling system from 6 to 12 Litres
