

Using specialist workshop equipment, Wynn's Cooling System Service protects your engine against the extremes of our climate and conditions your cooling system for ultimate efficiency and performance.

- Removes and replaces up to 95% of old coolant.
- Safely cleans away and removes rust, scale and debris.
- Prolongs radiator and water pump operating life.
- Conditions cooling system and helps prevent leaks.

# Protection For Your Cooling System

Overheating is one of the biggest causes of roadside breakdowns in New Zealand. It is also one of the most avoidable with regular maintenance.

In addition, a poorly maintained cooling system can lead to a host of running problems and other annoying faults.

Like all fluids, coolant degrades over time and its ability to cool and protect your engine diminishes.

Scale, rust, dirt and debris builds up inside your cooling system, clogging the galleries and adding to your cooling system's inefficiency, increasing the chances of mechanical failure and serious engine damage.

Basic draining and refilling of the system only replaces less than half of your old coolant, and leaves damaging rust and scale deposits behind in the engine. Fortunately, we have a solution.

## Essential Preventative Maintenance

Don't wait until it's too late. Regular maintenance of your cooling system will ensure your engine stays cool and protected, reducing your chances of a breakdown and expensive repairs.

**DIRTY RADIATOR**

**CLEAN RADIATOR**

**This service is recommended for all cooling systems and is compatible with all types of engine coolant.**

## Here's What We Do

Using state-of-the-art equipment, Wynn's Cooling System Service will thoroughly clean and re-vitalise your cooling system internally. It replaces up to 95% of your old coolant and safely removes damaging deposits from the engine, radiator, heater core, and hoses.

A proven product is then added to the fresh coolant to help prevent corrosion and cavitation, lubricate the water pump to prolong pump life, and help as a preventative against future cooling system leaks.

Following a Wynn's Cooling System Service, your engine is fully protected against the extremes of our climate and conditioned for ultimate cooling efficiency and performance.

It's quite simply one of the most important things we can do for your car!
