Fuel System Service

**IMPROVED ECONOMY,
PERFORMANCE,
& EMISSIONS**

When it's
Wynn's
...it works!

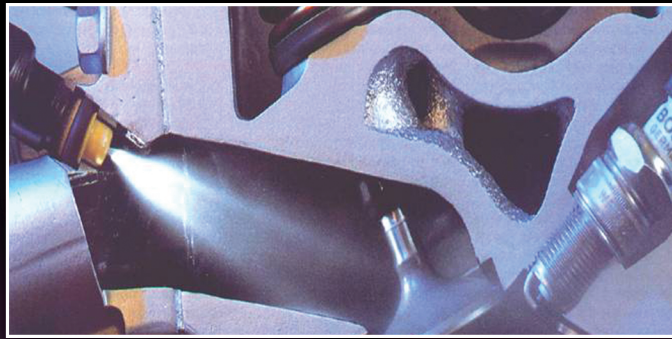

More than anything else, the way in which your engine burns fuel has a dramatic effect on the performance, fuel economy and exhaust emissions of your vehicle.

Today's fuels leave gum, tar and varnish deposits on the inside of your engine - clogging injectors, intake valves and throttle bodies, and interfering with the operation of important engine management systems.

Longer term problems can arise such as poor starting, rough idling, hesitation, misfire or pinging.

Regular servicing of your fuel system ensures the correct operation of one of the most important functions of your engine. A clean, efficient combustion process eliminates wasted fuel, reduces pollutant exhaust emissions and restores lost power and performance.

If it has been 15,000 kms or twelve months since your last fuel system clean we recommend you ask us to include it in your routine maintenance schedule today.

Wynn's Fuel System Service completely restores the cleanliness and efficiency of combustion, improving economy and saving you money.

Before

After

Intake valve before & after cleaning. The correct seating of cleaner valves improves performance and emissions.

Before

After

Air intake butterfly before and after cleaning. Restored power and fuel economy.

Fuel System Service

- Improves performance and driveability
- Improves fuel economy
- Maintains cleaner exhaust emissions

Using specialist workshop equipment, Wynn's Fuel System Service restores the engine performance you expect.

Your wallet will thank you too!
